

Lead With Wisdom

Grow an authentic understanding of those you lead, the terrain ahead, & the best way forward

Just as good surfers read and understand the ocean, good leaders read and understand people. Develop a foundation of self-awareness, emotional intelligence and mindfulness that then enables you to engage authentically with those around you, and lead them skillfully through the challenges ahead.

We'll support you to build excellent working relationships with your team, excel at difficult conversations with stakeholders, increase trust and collaboration within and between teams, and ignite the desire and productivity of those around you through even the wildest conditions.

Approach:

Creative Teams’ programs are ‘action learning’ programs. Action learning is a process of learning through the development and practice of new mindsets and actions, rather than through traditional instruction or ‘training’.

The action learning process leads to ‘learning conversations’ and thereby creates a ‘learning team’. By increasing the learning capacity of the team as a whole and empowering each individual within it, action learning enables the transformation of team culture.

Participants engage intellectually, emotionally, physically, verbally and non-verbally, giving people the opportunity to contribute in a way that feels comfortable. Most importantly of all, there is a good deal of laughter that brings us together.

“I’m motivated in my work with teams by the pursuit of happiness and connection between people. I get to see people at their most generous, their most honest and their most free.”

James Gill, Director, Creative Teams Consulting.
